Thanks, Kevin.

Ex. 6 Personal Privacy (PP) it's probably better we get validated results **Ex. 6 Personal Privacy (PP)** after this community engagement event. Everyone at HQ that was involved in posting the results is totally engulfed in the community engagements event prep.

Hi Rick,

Sorry for all the confusion. I was asked Joan if a map was posted because Jenny Wilson in Region 5 was asking about it. I told her that I didn't think a map was posted but I wanted to confirm that it wasn't. I forwarded the URL to the EPA's PFAS webpage to Jenny so she could see what was posted.

I was just talking with Roger and we have not yet seen the validated results for the second round of testing. We're working with Chemours right now to schedule a meeting for next week for early the following week. Andrew Hartten did tell Roger and I earlier today that Amesville, OH had non-detect in all of their samples so that's good news!

Kevin,

Joan Schaffer forwarded me your request about the GenX sample results posting. Here's the link to where the GenX data from Chemours' sampling is located:

<https://www.epa.gov/pfas/site-specific-information>

I know we did not post a map, just a summary of the lab results. Has someone been asking for a map of the sampling locations?

Do we have final validated data for all the sampling from the second round and are ready to post the results?

Subject: Washington Works GenX Results

Hi Joan,

I have a quick question about the Washington Works GenX sampling results that were posted to the EPA's website. Did we ever post a map to the website or is it just a table of the results? I don't think a map was ever posted but I just wanted to check with you. Also, can you provide me with the URL for that page? I'm having difficulty finding it on the website.

Thanks!
